

BRIVAL FK sp

TECHNICAL INFORMATION

BACTERICIDE DETERGENT FOR ENVIRONMENTAL AND FOOD INDUSTRY USE

WHAT IS BRIVAL FK sp?

A disinfectant detergent specially formulated for the cleaning and disinfection of heavily soiled areas and utensils. Eliminates odours and removes even the most engrained dirt. Kills the majority of bacteria on application, and impedes the proliferation of the remainder for a further period.

WHERE TO USE?

Authorized for general environmental disinfection and for disinfection in the FOOD INDUSTRY and horticultural packing houses. Used for cleaning floors, utensils, the disinfection of waste disposal bins and rubbish lorries. In cold storage chambers with food residues or strong odours (fish, rotten fruit etc.). Cleaning and disinfection in the packaging processes of fruit, fish, meat etc.

DOSAGE & METHOD OF USE

- Before applying the product read the product label carefully. To avoid risks to the person and environmental risks; follow the instructions.
- Conforms to UNE-EN 1276 in dirty conditions. Antiseptics and chemical disinfectants. Quantitative suspension test for evaluation of bactericidal activity of chemical disinfectants and antiseptics used in food products, industry, home and community.
- All necessary measures must be taken to ensure that food, machinery or utensils that are handled on the premises, or facilities previously treated with this product, do not bear any residue of any of its components. To ensure this, all treated areas should be rinsed properly with drinking water before use.
- The application of this product in the food industry for contact disinfection of surfaces and equipment must be carried out in the absence of foodstuffs.
- Do not mix with any other chemical products.

How to use in contact disinfection: the product dose is applied in diluted form by hand, spray, soaking or wiping for the disinfection of surfaces and equipment.

DOSE: Dilution of 10% to 30% or even neat depending on the dirt to be removed.

Not suitable for organic matter, anionic detergents, ammonia derivatives or hypochlorites.
Not suitable for use with chromium, lead, aluminium, tin, zinc or their alloys (bronze, brass, etc).

PACKAGING

20 kg bottles or Box of 4 x 5 kg bottles

TECHNICAL CHARACTERISTICS

Form:	liquid
Colour:	red
Aroma:	no fragrance
Density:	1.023 ± 0.005 gr/cm ³
pH (at 1% in water):	9.4 ± 0.5

COMPOSITION

Contains among other ingredients: sodium hydroxide (<5%), alkyldimethylbenzylammonium chloride (1%). Adjuvants, additives and water qs 100%.
